inventions!

our impact

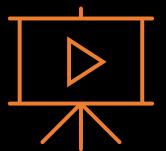

200+ experiences
100+ brands
1M+ impressions

Endless Runner

Endless runner is an augmented reality game where the player runs toward the goal and picks up things along the way by moving to the right or left.

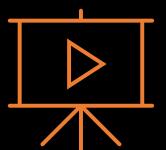

Click to watch

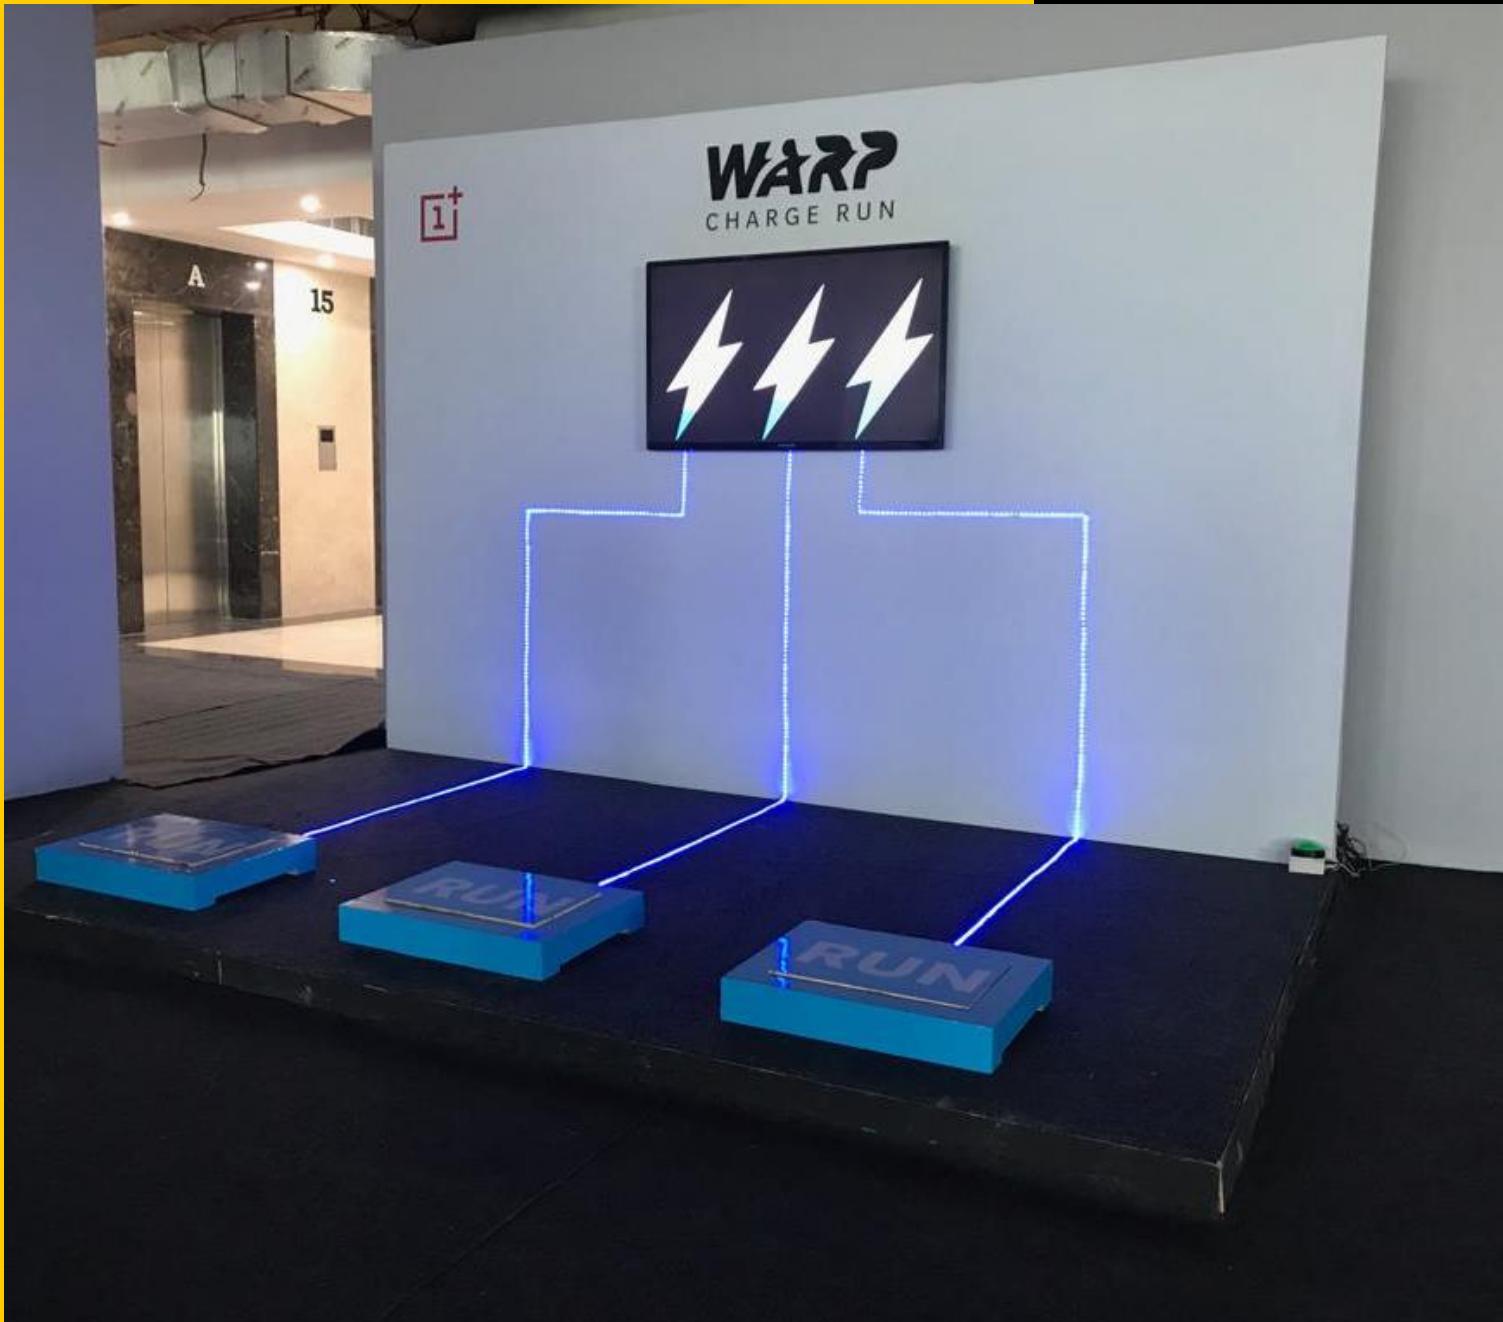

Interactive Wall

A big screen that can show digital content and let people interact with it is called an "interactive display wall." Users can interact with the content in different ways, such as by touching it or making hand gestures. People will be interested and learn something from this.

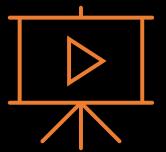

Click to watch

Run To Charge

We provide a program called "Run to Light Up" as a way to encourage people to lead more physically active lives and to foster a sense of healthy competition.

Participants engage in a competition against one another by running on a Run Pad, which in turn causes an LED strip to become illuminated.

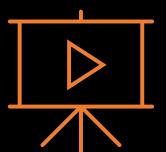

Click to watch

Digital Flipbook

Digital flipbooks are digital counterparts of traditional flipbooks, which are little books with visuals that change gradually from page to page.

Flipbooks can be used to generate interactive marketing materials and more. Digital flipbooks can zoom, scroll, and have interactive buttons or links.

VR Car Racing

VR car racing is a game where you can race or drive a car in a virtual world. In VR auto-racing games, you drive a car around a course or circuit against other players or computer-controlled opponents. They are a fun and interesting way to drive and compete, either for fun or to learn.

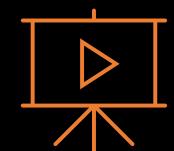

Click to watch

Scanny

The most creative way to show off your product is with Scanny. The see-through effect of the sliding display will show both the details of the product and the information that needs to be shared.

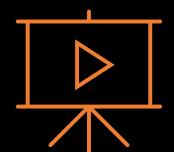

Click to watch

Mindwave Car Racing

The individual must wear a sensor called neurosky on their head. We have labored to develop a fictitious event in which automobiles, bicycles, and other such items can be moved by gauging the participants' instantaneous concentration.

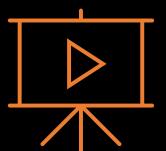

Click to watch

360 Vine Booth

360' vine booth can take slow-motion videos from any direction. Guests stand on a platform and use a remote to make the slow-motion arm circle around them automatically.

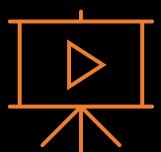

Click to watch

Tweet Bot

Inviting visitors to interact with your Tweet bot is a win-win for everyone involved. Our social café is equipped to handle events of any size. Visitors can claim their free prizes by tweeting the event's hashtag and the corresponding number printed on the box they've chosen to crack open.

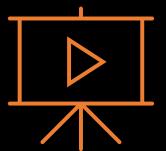

Click to watch

AR Photobooth

AR Celebrity Booth allows users to take photos with their favorite celebrities.

As users pose for the camera and stare at the screen, an augmented celebrity poses next to them.

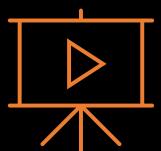

Click to watch

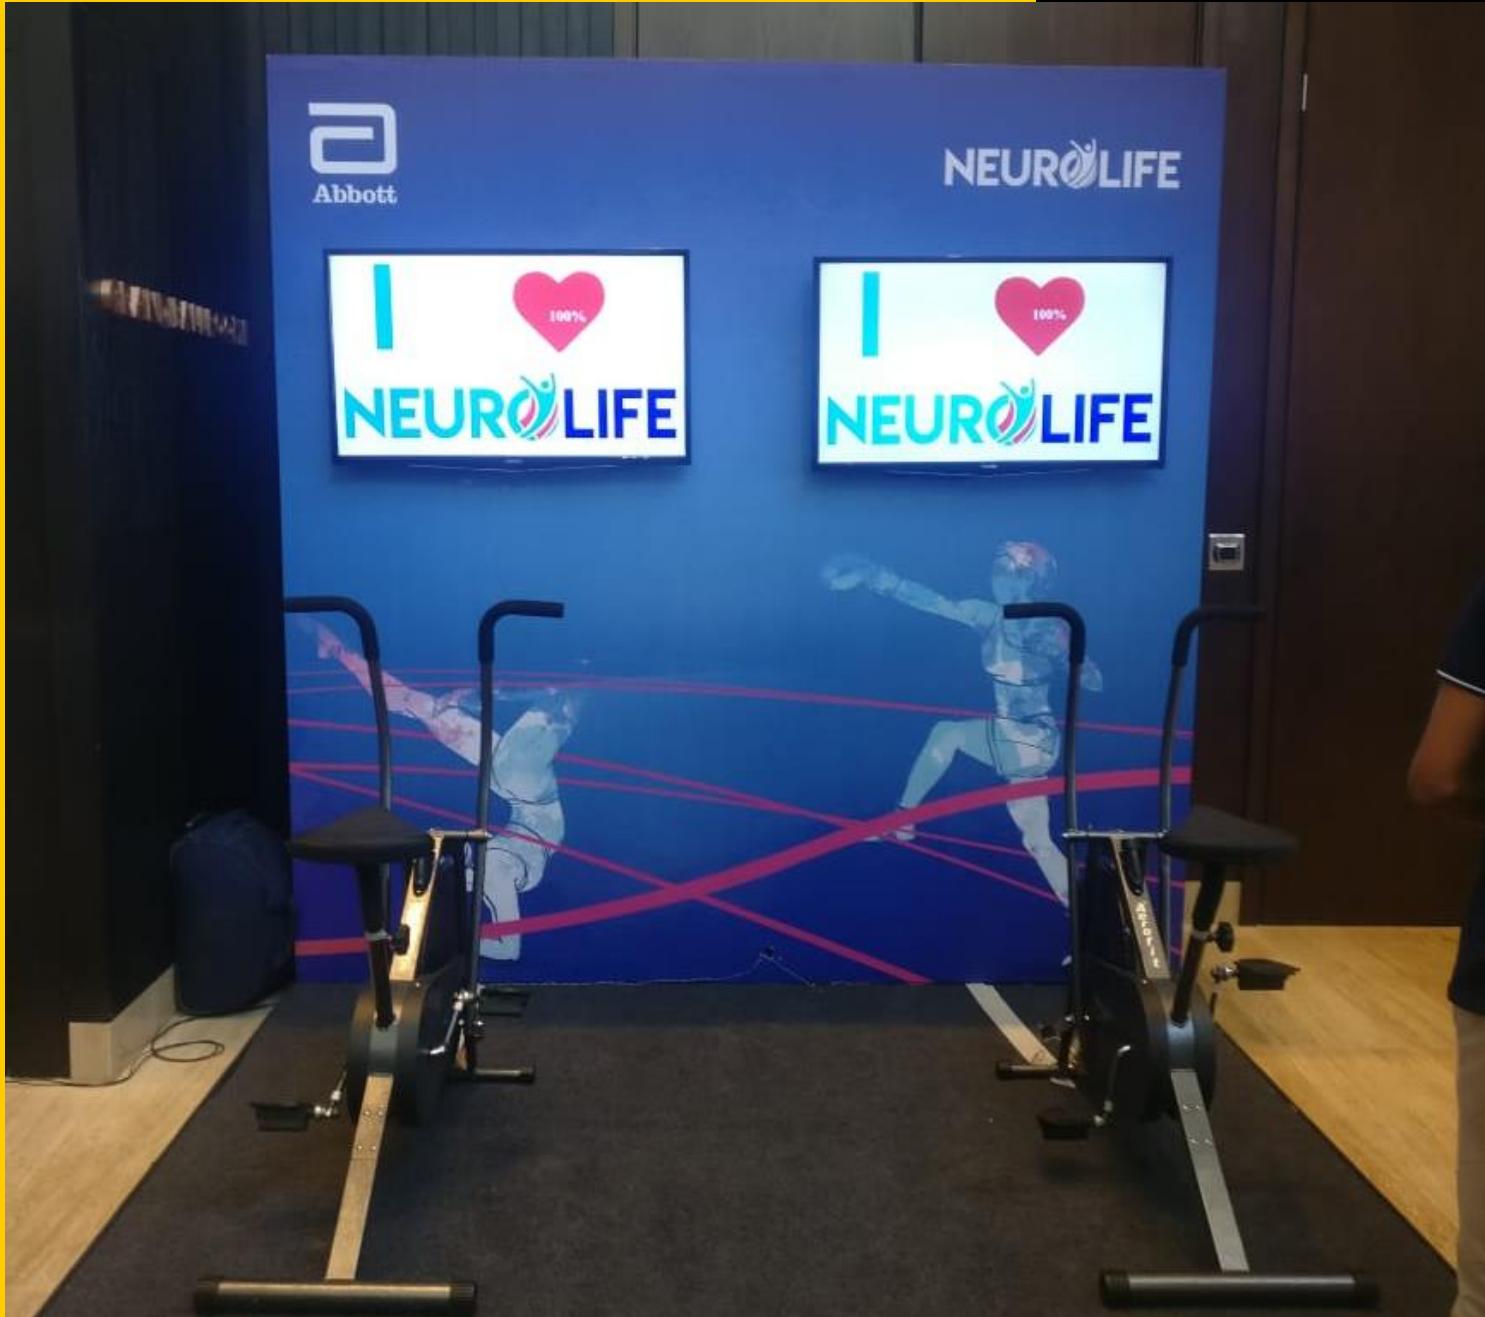

Laser Dodge

A laser dodge game is a form of game in which the player must dodge or weave through lasers in order to avoid them.

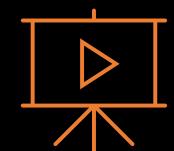

Click to watch

Cycle Activity

A pedal to light up is a device that lets people control a light or other electrical device by pressing a pedal or switch with their foot.

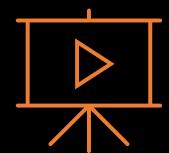

Click to watch

Kinect Walk

The player's progress in the game is determined by a sensor scan and recording of the player's physical characteristics. It's up to the player to make sure they're taking the right steps in order to succeed.

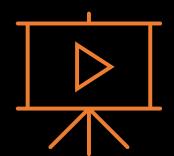

Click to watch

Mosaic Wall

A digital image known as a mosaic photo is one that has been assembled from a number of separate photos or photographs to form a single, more comprehensive picture.

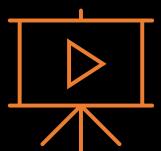

Click to watch

Pyramid Photobooth

A photo booth that uses a special effect to make a stunning background for pictures. Photos shot inside the booth provide a sense of depth and dimension thanks to the booth's pyramid design, which may also be used to make a wide range of other compositional choices.

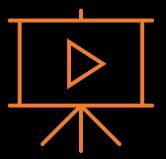

Click to watch

Holobox

The holographic content produced by Holobox will blow your mind. The Holobox allows us to create a lifelike 3D representation of individuals via live connection or prerecorded footage.

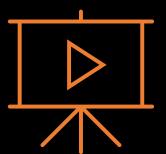

Click to watch

Virtual Paparazzi

Virtual paparazzi is the use of computer-generated photographs or films to simulate being followed or observed by paparazzi. In a fictional or fantastical environment, this might be utilized to imitate the sense of becoming a celebrity or famous figure.

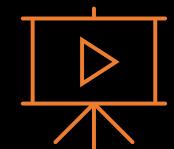

Click to watch

Word Cloud Booth

Word cloud photo booths accept user input to create a visual representation of a phrase or phrase cluster, which then serves as a backdrop for photos shot within the booth.

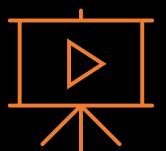

Click to watch

AI Photobooth

Our AI photobooth smartly understand the composition of the frame and applies the right filters and effects to create an image that is truly worth sharing on your social handles or getting it printed!

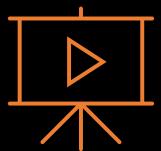

Click to watch
